Manifesto

In today's digital world, information is so easily and frequently shared, but even faster forgotten.

We believe that any **content** that truly **matters** should get the **attention** it deserves.

Our range of high quality solutions support **customers** to **stand out** with their message and reach their goals.

Important messages need to be **seen, read and preserved**. Only **tangible and touching** communication builds strong relationships.

We believe that any content that **truly matters** should get the attention it deserves.

Super-strong permanent bond. The crimping movement removes additional space for guaranteed binding quality. With our binding systems you can crimp the spine for an optimal fit - to match with the thickness of the document. A patented innovation unique on the market, to be sure that no pages will get lost from the bundle and your important message remains convincingly powerful.

Thermal Binding Machine 8.2

Binding or Automatic crimping documents up to 340 sheets.

Peleman's patented binding machines are easy-to-use devices to present all important documents neatly, such as company policy, labour regulations, offers, proposals etc.

Features

- › Dimensions: 480 x 295 x 390 mm
- › 2 binding compartments (2 x 25 mm)
- › 1 automatic crimper
- › From 1 - 340 sheets
- › 2 cooling racks
- › Weight: 11,52 kg
- › 220-240 V~50 Hz
- › 2 x 175 W
- › CE-certified

LAY-FLAT THERMAL HARD COVERS

BINDING SYSTEMS

Meetings have never been so much fun! This new concept combines a notebook with pre-made contents together with a unique box. The pages of the notebook lay perfectly flat and are pleasant to write on. Everything for a 'Perfect Meeting' for your employees, partners, clients, customers, sponsors, ...

► Perfect Meeting Book A4

The Perfect Meeting Book A4 has a high comfort to write and read. By using our V-Paper, the pages remain completely flat. The content of the book is formatted to make perfect notes during a meeting. But depending on the occasion (workshop, training, project meeting,...) the contents can be adapted. The Hard Cover is easy to customise with your logo or name.

Choose your color

► Perfect Meeting Book A5

The perfect meeting book is also available in a handy A5 size. Here too, the lay-flat technique is used, allowing you to create a full spread. By using V-Paper you obtain the best-possible printed result, which is easy to read and to write on. The Hard Cover is easy to customise with your logo or name.

LAY-FLAT FLEX COVERS

BINDING SYSTEMS

Plus Flex Cover is the right solution for any document presentation. It has a crystal-clear sheet on one end and a matt-frosted finish on the other side. It's your choice of impression. The Plus Flex Cover has an extra sheet of anti-static paper on the glossy side of the cover.

The OK paper is actually the first page during the binding, crimping and cooling process. It makes sure that the real first page of the presentation doesn't get the static electricity of the Crystal sheet, and glides into the liquid resin.

LAY - FLAT PAPER

The combination of three techniques, creasing, folding and pressing, twists the paper near the edge, ensuring that bound documents of any size lay completely flat.

The high-quality Lay-Flat Paper allows you to print on both sides of the sheet without compromising on quality, reducing your paper consumption by as much as 30 percent.

The V-Paper Tower brings you now the perfect solution which ensures that every single sheet (of any size) – from short presentations to thicker reports – lays flat. The V-Paper Tower makes a double-fold near the edge of every sheet, which can then be bound together with triple staples, perfect binding machines or thermal binding systems. The result is a lay-flat book which is easy to read and write in.

In line with the requirements and preferences of today's users, the V-Paper Tower has been designed to create a double-fold on every sheet, turning any paper into lay-flat paper. Your customers always expect the best possible paper and printed presentations from you. From now on, you are also able to offer them the best lay-flat finishing solution.

Features

- The V-paper Tower is an automated system that puts a double-fold in every sheet.
- 6.000 A4 sheets / per hour.
- Grammage / mic2: minimum 70, maximum 250 of any paper type
- Sheet size: max. 320 mm length and width.
- Electrical power by 220 Volt: 1.000 Watt.
- No warm up time, high efficiency.
- Small footprint: length 1,2 m x width 0,8 m x height 2,5 m

SCAN ME

LAY - FLAT PAPER

The V-Twister has been designed to turn your double-sided printed or printable paper into lay-flat pages, one by one. Through a single-step process, our innovative technology forms the paper fibres for each sheet, creating a supple hinge at the spine of the book. This makes your publication lay open effortlessly.

PRINT-IN

The Print-In technique is a process to print nameplates or photos onto metal. These plates can be used for identification, personalisation and signage. The outcome is a weatherproof, UV-resistant and colour fast product. For this process you need a Print-In printer and Print-In paper to create a base layer. This baselayer will then be capable to transfer the ink during the printing process via the Print-In press machine.

► Print-In Process

WINDOW CUTTING

UV PRINTING

PERSONALISATION SERVICES

Window

Have you not yet decided what title or message you want for your presentation? No problem. Simply order your favourite cover with cut-out window and use the first page of your document to display the title or message.

Starting from 10 pieces.

Golden or silver corners

Need some extra durability? Or want to add that golden bling effect, to make it more exclusive? Adding metal corner guards will do the trick both ways. Enhancing longevity and adding a classy detail.

Starting from 10 pieces.

Hotfoil

Hot foil is a printing method of which foils are transferred to a surface at high temperatures. An easy way to make your products stand out, especially when using metallic foils. Ideal to personalise your books, contracts, notebooks, agenda, and much more. A technique that gives a more luxurious finish.

Starting from 20 pieces.

PERSONALISATION SERVICES

Silkscreen

Ideally suited for bold graphic designs. It's excellent for printing on hardback clothbound cover books and gift boxes. The inks used are very durable and the opaque colours are extremely vivid, so your personalisation will stand out like real Pop Art work. BANG! POW! BOOM!

Starting from 25 pieces.

Transferprint

Transfer printing works by using a specific time duration, temperature, and pressure to apply the transfers. Under the effect of heat, the ink detaches and fixes itself on the product. A versatile form of personalisation, suitable for rich detailed high-quality full-colour printing - on a wide range surfaces. Because details matter.

Starting from 1 pieces.

Flat Bed Foil Printer

Allows you to personalise your books, notebooks, agenda, contracts, with foil directly printed from a digital file. Instant personalisation, endless possibilities. Print on any smooth flat surface in a variety of colours. You and your work will always stand out.

Starting from 1 pieces.

PERSONALISATION SERVICES

UV Printing

Almost every product can be personalised. Your customer's logo or specific design can be beautifully printed in full colour with UV printing on pretty much any material. The ink actually becomes part of the object itself. That makes it weatherproof, UV-resistant and scratch-free. Perfect for indoor and outdoor advertising. Come rain or sunshine!

Starting from 1 pieces.

Print-In

The Print-In technique is a unique process to print nameplates or photos on metal. These plates can be used for identification, personalisation and signage.

They are weatherproof and UV-resistant, and scratch-free. Ideal for outdoor use.

Starting from 1 pieces.

HardCoverMaking

Our HardCoverMaker 650 is the unique solution for personalized photo book covers, Peleman Boxes, A3 Displays, RingBinders, PortFolios, ... We can personalise the Hard Cover Basic with a design of your choosing.

Starting from 1 pieces.

PERSONALISATION SERVICES

Peel & Stick Sheets

This ready-to-use solution has a self-adhesive area that allows you to glue any type of print directly into our product. No sticky situation with spilled glue for you! A smart and unique innovation that will simplify your life. Print out your photos and create your very own photobook / panel in no time. The ideal gift for someone very special.

Fully customisable with the artwork of your choice. Enhance your products by giving them the finishing touch that your customers will remember. Add a personal touch to turn them into powerful branding tools with your own corporate design or sparkling full colour artwork. Stand out from the crowd. Boost top of mind awareness.

PERSONALISATION SERVICES

Full colour Thermal Hard Cover A4 Landscape

Mirror sheet white

For many writers, students, architects and programmers the ideal notebook is ... landscape orientated instead of portrait. Why? Their chalkboards, smart boards and laptops are oriented in the same way. So when seamlessly collaborating together they're using the same orientation. No leftover spaces. No voids occur.

So smart! Think outside the box and try it yourself.

Full colour Photo Book A4 Landscape

Mirror sheet black

Give your photobooks a professional finish and high quality look with a Full colour Photo Book A4 Landscape. Our patented thermal steel binding system ensures a solid, durable bind. Cherry on top is the fully customisable cover that will turn this book into a unique piece of art. Everybody will be impressed.

Full colour Thermal Hard Cover A3 Landscape

Bigger. Better. Bolder. This A3-size landscape design is a hefty eyecatcher - that will stand out in any place. Impossible to ignore. Showcase your style and identity in a professional way, with these customisable full colour hard cover, that will turn your printouts into memorable presentations.

PERSONALISATION SERVICES

The latest addition to our wall art line allows users to create their very own décor pieces in under a minute. Ideal for retailers, gift shops, photographers, hobbyists as well as pro decorators, these displays will turn any photo, drawing or creative artwork into custom canvas prints. Unlike other wood-framed solutions in the market that often require a trained professional's help for the canvas material to be stretched and wrapped, Peleman's Canvas Frame can be assembled by any user - no stress.

RETAIL PRODUCT RANGE

A beautiful, eco-friendly bamboo photo panel for sticking on photos in a few seconds. Due to the self-adhesive layer, you do not need a machine. Remove the protective film and stick your photo on the bamboo panel. You can hang this panel on the wall or put it upright. Due to its 28mm thickness, the panel will not fall down. You can use it portrait or landscape.
